- 18 Assessment
- 22 Assessment frameworks
- 24 Project Packs
- 26 In-class resources
- 33 A letter to educators

**The Oxford International Curriculum offers a new approach to teaching and learning, placing joy at the heart of the curriculum by fostering wellbeing, educating learners to live more sustainably and developing real world skills for students' future academic, personal and career success.**

This all-through curriculum integrates curriculum materials, continuing professional development, assessment and world-class resources, building the foundations to prepare every student for academic success in international GCSEs, AS and A-levels, including in OxfordAQA examinations.

Through seven subjects – English (or English as a Second Language), Maths, Science, Computing, Wellbeing, Global Skills Projects, and Sustainability – the Oxford International Curriculum offers your school a coherent and holistic approach with year-on-year progression. This spiral approach deepens students' knowledge and ensures a smooth transition across every stage of their educational journey, equipping them with the skills to shape their own future.

Through this approach, we can help your students discover the joy in learning and develop the skills they need to thrive in a changing world.

# Introducing a curriculum for teachers and learners with a vision

# What do you see?

# I see the joy of learning

## Nurturing creativity, inspiring curiosity, shaping the future

At Oxford University Press, we are committed to enriching the lives of learners across the world through education by developing the highest quality academic and educational resources and services. That's why we invest 100% of the money we make back into education and research.

As part of the University of Oxford, we combine a deep knowledge and understanding of pedagogy to provide quality resources that impact positively on learning. We are trusted by leaders and practitioners to raise levels of attainment all over the world – this is our passion and motivation.

At Oxford University Press, we recognize that we are living in an ever-changing world, where the way we work, live, learn, communicate and relate to one another is constantly shifting. In this climate, we need to instil in our learners the skills to equip them

for every eventuality so they are able to overcome challenges, adapt to change and have the best chance of success. To do this, we need to evolve beyond traditional teaching approaches and foster an environment where students can start to build lifelong learning skills for success. Students need to learn how to learn, how to problem solve, be agile and work flexibly. Going hand in hand with this is the development of self-awareness and mindfulness through the promotion of wellbeing to ensure students learn the socio-emotional skills to succeed.

What's more, a focus on cultivating a growth mindset, where students learn to thrive on challenge and see failure as a way to stretch themselves, will act as a foundation to improve their performance.

That's why we have developed the Oxford International Curriculum.

Oxford University Press is a department of the university publishing to further the university's objectives of excellence in scholarship, research, and education.

## The Oxford International Curriculum helps to develop students who are:

# I see challenge seekers, problem solvers, next leaders

By promoting wellbeing, developing global skills, and focusing on a sustainable future, the Oxford International Curriculum will prepare your students for success in an ever-changing world, giving them the springboard to achieve academically and nurturing them to shape a better future.

The Oxford International Curriculum promotes teachers' and learners' resilience, agency, and self-regulation to cope in the world of tomorrow.

This focus on wellbeing aims to promote good mental health to enhance students' lives inside and outside of the classroom. Key themes of wellbeing include:

## Taking care of the body

Learning how keeping active and eating healthily can directly impact on positive mental health.

## Taking care of the mind

Promoting mindfulness to train students to be more optimistic and manage stress.

## Taking care of relationships

Learning how to build and maintain friendships and relationships with family, how to communicate with others more effectively, and how to connect through acts of kindness.

## Taking care of self and the world

Encouraging students to have a focus and find purpose in the world around them, helping them to aspire to be better citizens.

**"There is strong evidence internationally that whole-school approaches to promoting wellbeing can have a positive effect on academic attainment."**

**Dr. Ariel Lindorff**, Department of Education, Oxford University, drawing on research undertaken as part of an impact study conducted across a wide range of countries.

OXFORD IMPACT  
EVALUATED

The Oxford International Curriculum enables students to succeed by recognizing that academic performance alone is not enough to measure their ability to succeed in life—we need to prepare students for real-world situations by equipping them with the global skills needed to thrive.

This focus on global skills aims to foster a classroom environment where students develop the skills for success:

## Creativity and critical thinking

Fostering students' innate curiosity and growing their critical thinking skills and creativity to solve problems.

## Real-world skills

Students develop the skills necessary to successfully participate in an increasingly interconnected, fast-moving, and digital world.

## Communication and collaboration

Students develop their written and oral communication skills for various audiences and purposes.

## Self-development skills

Students reflect not only on their learning and how they learn, but on who they are as ethical, rational, and social beings.

The Oxford International Curriculum encourages teachers' and learners' aspirations for a better world of tomorrow by preparing them with the knowledge, skills, and attitudes that will help them make the shift towards a sustainable future.

This focus on sustainability aims to support students in building a healthy and sustainable world for future generations. Key themes of sustainability include:

## Living on planet Earth

Understanding Earth's life-support systems, living sustainably, the power of limits, nature-inspired solutions, and caring for our local environment.

## Taking responsibility for the difference we make

Learning to recognize and protect the commons, monitor changes, understand our impact, collaborate, and help each other team.

## Making change

Learning to think about and change the way we think, make impactful changes, address root problems, and understand how everything is connected.

Practical and robust continuing professional development supports the implementation of this project-based learning approach—see page 16 and 17 for more information.

The Global Skills Projects and Sustainability curricula are taught through **project-based learning**. Project-based learning allows each student to engage with skills at their unique level, permitting a personalized learning experience. It is an active, enquiry-based pedagogy that allows rich interdisciplinary learning as students engage with real-life scenarios that demonstrate the relevance of skills and theories and learn valuable skills first hand.

# I see an exciting pathway through subjects and levels

## One, all-through curriculum

The Oxford International Curriculum offers coherence, continuity, and consistency, to ensure a smooth transition at every stage of the educational journey, from Early Years to Year 9.

It builds the foundations to prepare every student for academic success in international GCSEs, AS, and A-levels, including in Oxford/AQA examinations.

### What does the Oxford International Curriculum offer you?

- a trustworthy and flexible route to equip all learners with the lifelong skills they need to fully engage with a changing world
- a structured guide to shape learning, starting with simple tasks and becoming more challenging to develop skills further
- clear guidance on what to teach with the ability to adapt it to suit students' own experiences and their local context
- teacher support to provide the richest possible learning environment for your students.

## Seven subjects, one approach

The Oxford International Curriculum spans seven subjects, which all have the same approach to the joy of learning. Wellbeing, Sustainability, and Global Skills Projects are at the heart of the four core subjects of English, Maths, Science, and Computing.

**Wellbeing** supports the practice of healthy habits of body and mind to enhance the lives of teachers and learners.

**English** develops the spoken and written communication skills that underpin all learning, enabling students to express themselves creatively. Choose an English option to support your school's needs.

**Maths** covers the interconnected learning that deepens understanding and problem-solving skills.

**Science** encourages learners to question the world around them with a sense of excitement and curiosity.

**Computing** equips learners with the lifelong skills they need to fully engage with the digital world.

**Global Skills Projects** combines project-based and interdisciplinary learning to develop thoughtful, innovative change-makers.

**Sustainability** combines project-based and interdisciplinary learning to equip learners with the knowledge, skills, and attitudes needed for a sustainable future.
